General note: The data relate to the entrances of all (Greek or foreign) dry cargo ships, tankers and passengers ships in the Greek ports, regardless of where they come from (either Greek or foreign port), including those vessels in ballast that entered in order to take goods or passengers on board. Vessels therefore which have entered for repairs, or for supply, or because of force majeure, etc., are excluded. Cruise ships and yachts are also excluded. Ferry-boats are, in general, not included, except those arriving from abroad. Traffic of other ferry-boats see table III.20. If a vessel has called at more than one port during a single voyage, its entrance in each port is counted.
