Explanatory notes

1. **Source of data.** Greece's foreign trade statistics are based upon the Customs declarations and other Customs documents.

2. **System of trade.** Special trade, i.e. imports directly from abroad for domestic consumption, plus imports customs-cleared from bonded warehouses or free zones. Exports of national products, namely goods wholly or partly produced or manufactured in the country, plus exports of nationalized goods, i.e. goods which have been included in imports and are then exported.

3. **Exclusions.** A) Import statistics exclude: a) Gold coins and bullion, German restitutions, military equipment and supplies. b) Fishery products of Greek taking, which are regarded as national production. c) Passenger's baggage, gifts sent for personal use and parcel post of small value. d) Articles imported by foreign Embassies and Missions. e) Goods imported for «free use» and intended for re-export. B) Export statistics exclude: a) Stores for use of national vessels and bunker fuel from bonded warehouses for foreign vessels. b) Goods re-exported from «free use» and those without exchange formalities. c) Goods exported and intended for re-import and d) Gift parcels of small value sent for private use.

4. **Valuation.** Imports are valued c.i.f., that is «cost, insurance and freight», to the port or place of entry at the Greek frontier, excluding customs

duties and other taxes. Exports are valued f.o.b., that is «free on board» ship or other means of international transport, at the port or place of despatch at the Greek frontier, including export duties and internal taxes.

5. **Unit of quantity.** Weight of commodities is shown in kilograms or in metric tons excluding the weight of such packing as required for their shipment, except in certain special cases otherwise defined in the Customs Tariff. Moreover some commodities are shown both, by the weight and by a special unit of quantity as for instance, heads, cubic metres, number etc.

6. **Countries of origin.** Country of origin is considered to be the country from which the goods were originally despatched to Greece.

7. **Countries of destination.** Country of destination is considered to be the country to which the goods are finally consigned.
